

HENNINGSEN FOODS

**Egg White Peptides (EP-2) - Quick energy when you need it!
Greater bioavailability than whey, soy or milk proteins**

Henningsen Egg White Peptides offer all of the nutritional benefits of egg white protein, plus increased bioavailability through a special enzyme hydrolysis process. This means the protein will be absorbed into your body fast for rapid muscle recovery and improved health.

EP-2 contains high levels of essential and sulfur amino acids, is fat free, and provides the added benefit of being label friendly to consumers. Henningsen EP-2 is a natural product and is kosher.

Applications:

- **Nutrition Bars**
- **High Protein Drinks**
- **Protein Fortified Foods**

Your source for quality egg products.
